

Intelligent Multi-channel IP Contact Center, iPECS CCS Q

iPECS CCS Q manages your customer enquiries more efficiently whether by phone, e-mail, text, web chat, or even Facebook and Twitter. The flexible and easy call flow and business process design tool make your Customer Service and Multi-channel contact management simple.

All-in-one multi-channel contact center solution

iPECS CCS Q is the most affordable professional Customer Service and Inbound Multi-Media Management & Reporting system for any business. CCS Q provides your business with the means to route and manage your customers and provide them options on how they want to contact your staff, in the best possible way. CCS Q offers powerful Skills Based Routing and Automatic Call Distribution with variable Announcement Management options that provide your business with state-of-the-art Contact Center Technology. Agents can log in and out of CCS Q and all the data from queues, traffic and agents is logged and reported on by CCS Report. It can be shown to your team in real time with our Business Intelligence Dashboard, providing businesses a powerful and integrated solution that can grow as you grow.

Performance & Results monitoring

iPECS CCS Report is integrated with CCS Q providing powerful reports for your inbound customer service channels and individual and team performance. Review resources you have to see that business targets are being achieved. With a well designed routing and agent plan you can analyze important information on your business. Ensure auditing and compliance guidelines are being met with complete history of all calls and activities.

Professionally manage one of your most important business needs - your customers calling you

Your customers calling you whether you are a formal call center managing inbound calls or an informal call group that collectively provides

a specific service or business function, CCS Q can help manage inbound call routing and call queue requirements improving the experience for your customers and your own people

The Possibilities are endless - give your customers options and/or automate your ability to service them better

iPECS CCS Q allows for a range of routing possibilities that allow your customers to choose how they contact you rather than just leaving them in queues – route to other groups, leave voice mail, transfer overflows to other offices, employ skill-based routing to the best trained team members, or even let them hang up but keep their position in your queue and you call them back. And with CCS Q's multi-media options handle E-mails, texts, Facebook and Twitter requests in the same way as you would handle a voice call providing your customers with the options that they deserve.

Call-Flow Designer

Our simple drag and drop tool for designing the call flows for your business—make changes anytime without needing to learn complex software and rules.

Workflow engine

Set the rules and best practices and let CCS Q do the rest. Skills based routing, powerful overflow rules, automated options for callers.
